- Political, economic and social stability in our country.

More on ‘zero waste’ shopping: This week I noticed that the Co-op in Old Town have a selection of frozen goods without packaging available.

Tip 7) Boil only the water you need

If everyone only boiled the water they needed every time they used the kettle we would save enough electricity to power the UK’s street lights for nearly 7 months. Also only use just enough water to boil your veg in and put the lid on (until they boil over) to save energy.
